Atelier Boonen - Creone KeyBox Basic, System & Expansion

Additional information

brand: CREONE

Creone KeyBox in three series: Basic, System and Expansion

The Creone KeyBox is a wall-mounted code cabinet for keys or small items that several people share. Each user opens only the door or compartment they have access to, with a personal code. You choose between three series: Basic with a keypad, System with a display and log, and Expansion to extend an existing cabinet.

Basic keeps things simple: you program up to 500 codes directly on the keypad, and a green LED shows that the cabinet is active. System has a display with a menu and records up to 3600 events: who opened which door or compartment, and when. It adds time zones, a double code, a blocking function and a usage limit per compartment. With the KeyWin Light PC software you manage the codes and read the log, and System can be connected to an external alarm or a card reader.

Each series comes in four sizes. The 9001 has one door with 32 key hooks, the 9002 two doors with 9 hooks each (8 in the Expansion version), the 9006 six small compartments for keys, badges or small items, and the 9500 one large door with 216 hooks. The 9006 is also available in stainless steel. Up to 15 Expansion cabinets can be connected to a Basic or System main cabinet, in any combination; you operate them with the keypad of the main cabinet.

The KeyBox runs on 230 V and is mounted on the wall. A battery backup is available as an option, so the cabinet keeps working during a power cut.

The KeyBox is a practical code cabinet, not a safe: it is not certified against burglary or fire. For keys that need to be behind a certified lock, see our key safes. If you want each key to be recognised individually, with cloud-based management and notifications, the Creone KeyBox KeyControl is the next step.

See also our other Creone key and locker management systems, supplied and installed by our own team in Belgium.

- Series: Basic (keypad, personal codes), System (display, log, KeyWin Light) and Expansion (extension cabinet without its own keypad, operated from the main cabinet)
- Models: 9001 (1 door, 32 key hooks), 9002 (2 doors, 2 × 9 key hooks; Expansion 2 × 8), 9006 (6 compartments, internal size per compartment 40 × 145 × 60 mm, H × W × D), 9500 (1 door, 216 key hooks)
- Stainless steel: 9006 in the Basic, System and Expansion series
- Users: up to 500 codes per cabinet; System: codes of 1 to 8 digits, log of up to 3600 events
- System functions: time zones, double code, blocking function, usage limit per compartment, date and time on the display
- Expansion: up to 15 Expansion cabinets per main cabinet, in any combination
- System connections: external alarm, external card reader, KeyWin Light PC software
- Construction: 1.5 mm galvanised steel; 9006 also in 1.5 mm stainless steel
- Colour: RAL 9001 cream; 9006 also in stainless steel
- Dimensions 9001, 9002 and 9006: 280 × 350 × 85 mm (H × W × D), 6 kg (Expansion 4 kg); 9500: 730 × 746 × 140 mm, 28 kg
- Power supply: 230 V; battery backup as an option (Basic and System)
- Mounting: wall-mounted
- Not certified against burglary or fire
