Atelier Boonen - Kaso PTK E 300

Additional information

brand: Kaso Safes

Kaso PTK 300 – Lightweight safe with certified burglary and fire protection
The Kaso PTK 300 is a reliable, certified safe offering solid protection against both burglary and fire. Its innovative BFP multi-wall construction provides high resistance while being up to three times lighter than conventional safes – ideal for installations with weight limitations.

The PTK 300 is EN 1143-1 certified (Grades 0 to 5 – ECB·S) for burglary resistance. With the exception of Grade 4, all models also offer 60 minutes of fire resistance for paper documents, tested according to NT FIRE 017 (60P).

The safe can be fitted with a range of EN 1300-certified locks (key, mechanical combination or electronic), and offers flexible interior configurations including shelves, drawers and media compartments.

The PTK series shares its structure with the Kaso E 300, but is focused on functionality and utility. The E 300 offers the same performance in a more refined and design-oriented finish, ideal where aesthetics are a priority.

Kaso safes are trusted for their technical performance, long-term reliability and certified security.
