Atelier Boonen - ATB AI

Additional information

brand: ATB Safes

ATB AI – Double-walled steel cabinet for documents and valuables

The ATB AI is a heavy, double-walled steel cabinet for keeping confidential documents, files and valuables under lock. It is built for companies, hospitals and other organisations that want more than an ordinary office cupboard. The cabinet is not certified: it has not been tested to a European burglary or fire standard.

The walls and doors are filled with high-density insulation material, but without a fire test there is no tested fire protection. We therefore do not offer the AI as a fire-resistant cabinet. If you want to store paper or data with tested fire protection, choose one of our fire-resistant cabinets.

The AI comes in two sizes. The AI3 has one door and is 1000 mm high, 700 mm wide and 540 mm deep, with 230 litres of capacity and two shelves. The AI1 has two doors and is 1785 mm high, 1000 mm wide and 540 mm deep, with 650 litres of capacity and four shelves. The internal depth is 430 mm. The shelves are height-adjustable and prepared for A4 hanging folders. An extendable drawer, a sliding hanging-file frame and a shelf with hanging-file rack are available on request.

The body and doors are double-walled, made of 2 + 1.5 mm steel. The door locks with a handle and six Ø 20 mm bolts: four on the lock side, one at the top and one at the bottom. A drill-proof armour plate protects the lock and a relocker blocks the bolts in the event of an attack. The doors open 180°. The cabinet has two holes for floor anchoring.

As standard, the AI has a double-bit key lock. On request, it can be fitted with a mechanical code lock or an electronic code lock with time delay, or with two locks: the key lock combined with a mechanical or electronic code lock. Colour: white aluminium RAL 9006, epoxy-polyester paint cured at 180 °C.

Looking for a cabinet tested against both fire and burglary? See our ATB PSL: burglary resistance S2 (EN 14450) and 30 minutes of fire protection for paper (EN 15659, LFS 30P), also available as a double-door archive cabinet of up to 919 litres.

See also our other security cabinets or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- Not certified against burglary or fire
- Double-walled body and doors, 2 + 1.5 mm steel
- Six Ø 20 mm bolts: four on the lock side, one at the top, one at the bottom
