Atelier Boonen - Fichet-Bauche Diva

Additional information

brand: Fichet Bauche

Fichet-Bauche Diva – Certified fire- and burglary-resistant data safe (S 120 DIS)

The Fichet-Bauche Diva is a premium-grade data safe designed specifically to protect digital media such as tapes, hard drives and optical discs from both fire and unauthorised access. It is certified to the European standard EN 1047-1, class S 120 DIS, meaning your data carriers remain protected for up to 120 minutes in case of fire, while the interior temperature stays below 50 °C. This certification includes a drop test and thermal shock simulation, ensuring uncompromised protection under extreme conditions.

In addition to its fire performance, the Diva is also certified for burglary resistance according to EN 14450, class S2, offering dual protection in a single safe.

The Diva's structure is built from corrosion-resistant galvanised steel with a multi-wall construction, filled with the exclusive Mirium fire-resistant insulation. Multiple protective seals prevent intrusion of heat,

smoke, dust and moisture, preserving the integrity of stored digital media even in adverse environments.

This safe is available in five models, with internal volumes ranging from 112 to 565 litres, and can be equipped with a variety of certified locks: the patented MxB-B key lock, the Moneo mechanical combination lock, or the Nectra electronic lock.

To illustrate the capacity: the largest model, the Diva 650, holds around 2,700 CDs or DVDs, or 1,222 DLT/LTO tapes; the compact Diva 100 takes 468 and 192 respectively

Thanks to its combination of advanced fire protection, certified burglary resistance and customisable interior, the Fichet-Bauche Diva is an ideal solution for organisations and IT environments where data integrity and operational continuity are critical.
