Atelier Boonen - Fichet-Bauche Helios

Additional information

brand: Fichet Bauche

Fichet-Bauche Hélios – Certified protection against burglary and fire (Grade 1 T2, LFS 60P)

The Fichet-Bauche Hélios is a safe with double certified protection against burglary and fire. It is A2P certified according to the European standard EN 1143-1 in Grade 1 T2 — stricter test criteria, carried out with more capable tools — following tests by the CNPP laboratory, and offers ECB·S certified fire resistance of

60 minutes for paper documents according to EN 15659 (LFS 60P).

Its multi-walled structure is filled with a high-performance composite, developed by Fichet-Bauche's R&D department, which optimises the weight-to-volume ratio. The door is locked by a vertical bolt over its full height; thanks to the profiled door with a fixed rear bolt, the door remains blocked even if the hinges are cut through. An exclusive anti-drill armour protects the locks and boltwork, and a passive blocking system is triggered automatically in the event of a burglary attempt. High-quality adhesive fire seals ensure lasting fire-tightness.

The Hélios is designed for easy daily use: handle on the left, key on the right, controls at the top of the door. The discreet hinges are tested over 50,000 cycles, and the special galvanised steel finish provides lasting protection against corrosion.

The Hélios is fitted with EN 1300 certified locks, A2P label: the patented Fichet-Bauche MxB key lock, combined with the MC4 mechanical combination or the Nectra electronic code lock. The optional factory-fitted DOCT alarm detects opening, shock and thermal attacks and is compatible with most alarm systems.

The Hélios is available in six sizes from 40 to 370 litres, fitted as standard with height-adjustable shelves and prepared for fixing to the floor. Numerous interior options are available: reinforced shelves, interior cabinets, sliding trays and holders for suspension files. From the same family, without fire certification: the Fichet-Bauche Millium.
