

The unique Trident range not only offers strong burglary protection from Grades III to VI, but also resistance against fire and explosives to ensure maximum protection for your valuables

Trident

BURGLARY, FIRE AND EXPLOSIVES PROTECTION

Key Features

- The Trident range is independently certified to cover three types of risk:
 - Burglary protection in Grades III–VI. Certified by ECB•S in accordance with the stringent European standard, EN 1143-1.
 - Fire protection for documents for up to one hour. Certified NT Fire 017–60 Paper by SP.
 - Protection against explosives in Grades III–VI EX. Certified by ECB•S in accordance with the stringent European standard, EN 1143-1.
- Seven models for each grade, ranging from 111 to 907 litres in capacity.
- Wide choice of key locks, combination locks or electronic locks.
- Range of interior fittings includes shelf, shelf for hanging files, extendable lockable drawer and lockable compartment.
- Ergonomically designed to allow for full access to the safe's contents when the door is opened 90°.
- Sizes 110–210 can be fitted with an optional deposit drawer trap.
- Size 600 can be fitted with up to two columns of safe deposit lockers and size 910 with three.
- Available with the door hung on the right or the left.

Testing

Burglary Certification: Grades III–VI, EN 1143-1 (ECB•S)

A range of tools typically used in burglary attempts were used to test Trident's level of resistance, from basic equipment, such as hammers and simple drills, to sophisticated thermal and electrical equipment, such as oxyacetylene torches and disc cutters.

Explosives Certification: Grades III EX–VI EX, EN 1143-1 (ECB•S)

Trident has also been approved for resistance against explosives – a particularly high level of protection for your valuables.

Fire Certification: NT Fire 017–60 Paper (SP)

In addition, Trident will protect documents from the effects of fire for up to one hour.

During the testing procedure, the safe was placed in a furnace and heated to temperatures around 1000°C without the documents inside sustaining any damage.

Lock Options

A series of EN 1300 certified key locks, combination locks and electronic locks is available to choose from.

Grade III

At least one EN 1300 Grade B lock must be fitted as standard. A second lock may be added upon customer's request.

Grades IV & V

At least two EN 1300 Grade B locks must be fitted as standard.

Grade VI

At least two EN 1300 Grade C locks must be fitted as standard.

As an option for all grades, a third lock may also be fitted under certain conditions.

Other Options

- Drawer deposit for sizes 110, 170 and 210 in Grades III to V.
- SDL 2000: two columns can be fitted in model 600 and three in model 910.
- Air tube or deposit slot can be fitted on top of the safe (non-certified)
- Planar protection for connection to central alarm system. Triggers alarm if an attempt is made to drill into the body of the safe (VdS approval).
- Diamond core drill (CD) protection: extra EN 1143-1 certification from ECB•S for Grades IV to VI.
- DOCT alarm system with in-built shock, thermal and seismic detection sensors. Available in two levels: standard risk and high risk.
