Kaso E-500

Your future is safe

A couple, a woman with long blonde hair and a man with a beard, are both wearing white bathrobes. They are looking down at a jewelry box that is open, revealing several pieces of jewelry including necklaces and earrings. The jewelry is displayed on a black background with white compartments. The scene is set in a room with dark walls and a window in the background.

*There are things you
want to keep safe*

Our new E-500 series safes combine contemporary Scandinavian design – simplicity, minimalism and functionality – with cutting-edge technology.

— *functionality* —

Scandinavian functionality means easy to use

In addition to great looks, we also wanted the new E-500 range of safes to be as easy to use as possible. Just enter the code and open the door. To lock the door, you don't need to touch the handle – just push the door closed and the safe is locked.

— *functionality* —

Plenty of
space for your
valuables

Electronic
lock is
standard

For an extra
clean look,
hinges are hidden
from sight

— functionality —

Standard panels

Smoky brown pear

Maple

Tailormade to your requirements

Standard front panels are smoky brown pear and maple, but other options are available upon request. Should you wish to fine tune the style even further from the stock colours black or white, you can order the safe body painted any RAL colour you desire. Also a variety of optional accessories is available to meet your storage requirements.

Examples of other panel options

Wenge panel

Aluminium panel

*Colour painted
RAL 9006*

*Colour painted
RAL 9003*

— functionality —

2. Lockable inner cabinet
3. Pull out drawer
4. Hideaway shelf for secret papers
5. Adjustable metal or glass shelf
6. Glass plate on top of the safe

— testing and facts —

World-renowned for high-quality security solutions

With over a hundred years of safe and vault manufacturing expertise, we are proud of our traditional craftsmanship. To safeguard our quality, every safe is inspected several times during manufacturing.

It takes more than welding steel sheets together to create a safe

Kaso's innovative, lightweight multi-layer BFP-Construction® enables manufacturing of light-weight safes without compromising the security level. Weight range of 200 to 340 kilograms means that E-500 series safe can be placed practically anywhere. Safes can be anchored either to the floor or to the wall.

Tests and certificates

E-500 series safes have been officially tested in the industry's leading and approved test institutes and laboratories

ECB-S certification ensures that we keep what we promise – E-500 safes are certified according to European Standard EN 1143-1 Grade II and III against burglary.

Fire protection for 60 minutes. Fire testing has been done according to NT Fire 017-60 paper.

The hinges have passed a test of 70,000 opening and closing cycles.

ISO 9001 certificate for production quality.

EcoStart certificate for dedicated environmental management.

Facts and figures

**Choose between two levels of burglary protection: Euro II or Euro III (EN 1143-1).
Three sizes to meet every need.**
