

## Atelier Boonen - Salvus Milano

### Additional information

Salvus Milano – Certified burglary- and fire-resistant safe (Grade II, LFS 30)

The Salvus Milano is a burglary- and fire-resistant safe, certified according to EN 1143-1, Grade II T2. It offers 30 minutes of fire protection for paper documents, tested to the EN 15659 – LFS 30 standard, which involves exposure to temperatures up to 850°C. This lighter fire certification is suited for environments with moderate fire risk.

The Salvus Milano safe features a multi-walled construction, filled with Ultra High Performance Concrete, offering strong resistance against both mechanical and thermal attacks. Its three-sided locking system with solid steel bolts is reinforced by an interlocking profile on the hinge side, which makes any attack on the hinges ineffective. A passive relocking device activates automatically in the event of a burglary attempt.

The safe is prepared for floor and wall anchoring and can be fitted with various EN 1300-certified locks, including key locks, mechanical combination locks, or electronic code locks.

The Salvus Milano fireproof safe is available in multiple sizes. The Model 46 is the most popular in the range, known for its dependable performance and excellent price-to-quality ratio.

Fireproof 30 min for paper

Burglary resistant Class 2

Indication of value storage Class 2: € 25 000 cash or € 50 000 valuables
