Atelier Boonen - Chubbsafes Duoguard GI

Additional information

brand: Chubbsafes

Grade I T2 with 60 minutes of fire protection

The Chubbsafes DuoGuard GI is a burglary resistant safe in Grade I according to EN 1143-1, certified by ECB·S to the new T2 version of the standard. T2 testing uses more powerful tools than before: power tools, grinders, cutters and thermal tools. The safe therefore withstands the means burglars use today.

All models protect paper documents against fire for 60 minutes according to NT Fire 017 – 60 Paper, tested by RISE (Research Institutes of Sweden). From model M-115, the safe is also certified by ECB·S according to EN 1047-1, class S 60 P.

Door and body are filled with Dualite, a torch-resistant barrier material that protects against burglary and fire while making the safe lighter. This also lowers transport and installation costs. The three-way boltwork with solid steel bolts is protected by anti-drill plates and an active relocker.

As primary lock you choose a key lock (Class A) or an electronic code lock (Class B), both certified to EN 1300. Dual locking is available from model M-60. The electronic lock offers a master code, a supervisor code and 8 user codes, a time delay of up to 99 minutes, an opening window of 1 to 19 minutes and an optional silent duress alarm.

The DuoGuard GI comes in 8 sizes, from 40 to 443 litres. From model M-115, extendable shelves, drawers, a lockable compartment, a shelf prepared for hanging files and a suspension file frame are available.
