Atelier Boonen - Sistec Euroguard SE 4 and 5

Additional information

brand: Sistec safes

Sistec Euroguard SE – Burglary-resistant safe Grade 4 or 5

The Sistec Euroguard SE is a high-security safe certified for burglary resistance, designed for applications requiring a high to very high level of protection against burglary. This range is tested according to EN 1143-1 and available in Grade 4 and Grade 5, with ECB·S approval. The Euroguard SE Grade 4 and 5 is designed for the secure storage of valuables, intensive use and situations where increased resistance to targeted burglary attempts is required.

The safe features a multi-walled body and door, constructed with high-quality barrier materials. The door is equipped with four-sided locking: three sides close with mobile, solid steel bolts. On the hinge side, fixed bolts provide additional anchoring into the safe body. As a result, attacks on the hinges have no effect on the security.

The locking mechanism is protected by multiple layers of armour over the locks and boltwork. A glass-plate relocker activates automatically in the event of tampering or attack and blocks the locking mechanism when manipulation is attempted.

The models offered by Atelier Boonen are supplied in the KB version. KB refers to **Kronenbohrer** / core drilling protection and indicates additional protection against attacks using diamond core drills (CD – Core Drilling).

Each Sistec Euroguard SE Grade 4 or 5 is equipped as standard with two EN 1300-certified locks, in

accordance with the requirements of EN 1143-1 for Grade 4 and Grade 5. Depending on the selected configuration, this can consist of a double-bit key lock and a mechanical combination lock. Optional electronic or mechanical combination locks, or a combination of both, are available.

The Euroguard SE Grade 4 and 5 stands out for its solid construction, refined finish and high-quality execution, making it suitable for intensive professional use. External hinges allow a door opening of up to 180°. The safe is prepared for anchoring through the base and rear wall and is supplied with adjustable shelves and a RAL 7035 light grey finish. Model 180 is supplied as a double-door safe.
