Atelier Boonen - Robur grade 6 safe

Additional information

brand: Robur safes

Robur VI CD EX – Certified Grade 6 Safe with Maximum Resistance to Burglary, Explosion, Drilling and Fire

The Robur VI CD EX is a Grade 6 certified safe according to EN 1143-1, designed for environments where maximum physical protection is essential. Certified by ECB·S, this model combines exceptional burglary resistance (Grade VI) with additional EX and CD classifications for explosion and core-drill protection. In addition, the Robur VI CD EX is fire-tested for 60 minutes for paper documents according to NT FIRE 017 – S60P. This makes it one of the most advanced and comprehensive Grade 6 safes available on the market today.

Unlike a standard Grade 6 safe, the Robur VI CD EX features enhanced protection against core drilling using diamond tools and has been successfully tested for explosion resistance in accordance with the European EN 1143-1 EX standard. Its multi-layer armoured construction, reinforced locking area, massive

locking bolts, and heavy-duty locking mechanism provide effective protection against sabotage and both thermal and mechanical attacks.

This Grade 6 safe is intended for high-risk environments such as banks, defence institutions, laboratories, diamond traders, currency exchange offices, and jewellers. It provides certified protection for explosives, weapons, confidential documents, and assets of exceptional value. With its ECB·S certification, 60-minute fire resistance, explosion- and drill-resistant design, and full compliance with EN 1143-1 Grade 6, the Robur VI CD EX represents a security solution without compromise — engineered for professional use where absolute reliability and protection are required.
