

Atelier Boonen - Robur VI

Additional information

Robur VI CD EX - Certified safe with maximum protection against burglary, explosion and core drilling

The Robur VI CD EX represents one of the highest levels of physical security available today. This Grade VI certified safe is tested and approved according to EN 1143-1, with additional CD (Core Drill) and EX (Explosion) classifications. Certification is issued by ECB-S, one of Europe's most respected independent certification bodies — and only two manufacturers worldwide have achieved this combination of certifications.

Unlike standard Grade VI safes, the VI CD EX model features reinforced armour on all sides to withstand attacks using diamond drilling tools. It has also passed explosion-resistance tests in accordance with strict European standards, making it suitable for high-risk storage of weapons, explosives, documents or high-value assets.

With its heavy multi-wall construction, certified locking mechanisms, and a wide range of configuration

options, the Robur VI CD EX is the ideal solution for professional environments where no compromises on security are acceptable.

Fireproof 60 min for paper
