Additional information

Fichet-Bauche Celsia – Fire-Resistant Safe (EN 1047-1, S 60 P / S 120 P)

The Fichet-Bauche Celsia is a high-performance fire-resistant safe, designed to protect paper documents and other sensitive items from the devastating effects of fire. Certified according to the strict EN 1047-1 standard, this fire-resistant safe offers up to 2 hours of fire protection at temperatures up to 1090°C, making it the ideal solution for securely storing documents in high-risk environments.

Available in three sizes: 200, 400, and 800 liters, the Celsia provides ample storage capacity for a large volume of documents. Its Mirium fire-resistant composite material, developed by Fichet-Bauche, ensures optimal thermal insulation, maintaining a stable temperature and humidity inside even under extreme fire conditions.

In addition to its exceptional fire protection capabilities, the Celsia has undergone a drop test from a height of 9.15 meters, ensuring the integrity of the safe and its contents, even if the safe falls due to a fire. The cooling period after a fire ensures that the internal temperature remains below 177°C for paper.

The safe is equipped with A2P certified locks, including the M3B key lock and Nectra electronic combination lock, offering optimal security and ease of use. Additionally, it provides several internal configurations, including adjustable shelves and sliding drawers, as well as an optional fire-resistant compartment for sensitive media (S 120 DIS certification).

The Fichet-Bauche Celsia offers exceptional fire protection, enhanced physical security, and flexible interior organization, making it ideal for the secure storage of valuable documents and items.

Fire resistant 120 min for paper

- Fireproof tested 120 minutes for paper according to EN 1047-1 120P
- Four-time locking
- Standard with Fichet-Bauche MxB key lock
- Height adjustable shelves
- Color: Blue/Grey
