# Salvus Verona HS – Security cabinet and secure filing cabinet for documents and valuable items

The Salvus Verona HS is a double-walled steel security cabinet designed for the secure storage of documents, files, electronic devices and valuable items. This reinforced cabinet can be used as a secure filing cabinet or burglary-resistant storage cabinet in offices, schools, shops and other professional environments where more protection is required than a standard metal cabinet can offer.

It is suitable for storing laptops, smartphones, tablets, cameras, keys, small equipment, files and other items that need to be protected against unauthorised access. Thanks to its practical storage volume, the Verona HS is particularly useful when multiple objects or documents need to be stored in an organised, secure and discreet way.

The Salvus Verona HS features three-sided locking with solid steel bolts and fixed bolts on the hinge side. External hinges allow the door to open 180°, making the contents easy to access. An EN 1300-certified double-bitted key lock is supplied as standard. Mechanical or electronic code locks are available as options.

Adjustable shelves provide flexible interior organisation. Pre-drilled holes in the base allow for floor anchoring. The Salvus Verona HS is available in four models, from 230 to 831 litres, in light grey RAL 7035 or anthracite grey RAL 7016.

This security cabinet is suitable for applications where documents, electronic devices, stock items or other valuable goods need to be stored safely, clearly and discreetly.

See also our other security cabinets or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- Three-sided locking with steel bolts
- Standard with a double bit key lock
- Shelves adjustable in height
- Anchor holes provided in the bottom
