Additional information

brand: Fichet Bauche

Fichet-Bauche Enigma security cabinet – IGI 1300 class B

The Fichet-Bauche Enigma is a professional security cabinet for the safe storage of sensitive documents, confidential files and valuable items. The cabinet meets the French "Secret Défense" requirements according to IGI 1300, class B, and was developed for professional environments where discretion, controlled access and structured secure storage are essential.

The Enigma is available in five sizes, from 250 to 1,100 litres, with one or two doors. The construction consists of double-walled doors 65 mm thick and 2 mm steel walls. Patented hook bolts, specially designed to resist mechanical attacks, and a blocking system that engages in the event of an attack provide increased resistance against unauthorised access. This system is mandatory on the class B version, which also features an opening counter and a sealed lock cover.

Depending on the intended application, the cabinet can be fitted with various locking systems according to EN 1300, A2P label. As standard this is the Fichet-Bauche M3B + 3 Tubes key lock; alternatives are the Moneo V mechanical combination lock (class B) or the Nectra electronic combination lock.

The interior is fully modular with adjustable or reinforced shelves, sliding trays, key holders and interior cabinets. Thanks to the integrated hinges, several cabinets can be placed side by side. The Fichet-Bauche Enigma is therefore suited to regular use in administrative, institutional or professional environments where sensitive files, confidential documents and valuable items must be stored securely and discreetly.
