Atelier Boonen - Salvus Arezzo

Additional information

brand: Salvus safes

Salvus Arezzo – Fire-resistant cabinet with burglary resistance (EN 14450 S2 / EN 1143-1 Grade 1)

The Salvus Arezzo is a fire-resistant cabinet with burglary resistance, certified by ECB·S according to the

European standards EN 14450 Security level S2 or EN 1143-1 Grade 1, depending on the version. For fire protection, this model is tested according to EN 15659 LFS 60P: documents remain protected for 60 minutes at temperatures up to 850 °C, without a drop test or cooling phase. This standard suits situations with a medium fire risk, such as homes or offices.

The Arezzo is built on the same principle as the Salvus Bologna: a multi-walled steel construction, filled with a special fire-resistant composite. The door is locked on four sides: three sides with moving steel bolts and, on the hinge side, fixed rectangular bolts that engage into the body. Even if the hinges are attacked, the door remains firmly locked. The cabinet is fitted as standard with a double-bitted key lock; other lock options are available.

With its generous interior volume, this cabinet is ideally suited to the secure archiving of large quantities of documents, binders and valuables. The adjustable shelves allow the layout to be adapted to storage needs, and the cabinet is prepared for anchoring. This combination of fire and burglary protection in a large format makes the Salvus Arezzo ideal for offices, practices and administrative environments.
