# Atelier Boonen - ATB Cashbox

## Additional information

brand: ATB Safes

## ATB Cashbox – Till safe with deposit slot and removable box

The ATB Cashbox is a compact till safe that protects cash at the collection point and during transport. Through the deposit slot, staff immediately secure large banknotes, so no more cash is ever within reach than necessary.

The system consists of two parts: a metal holder and the box itself. The holder is fixed beside the cash register, underneath a desk or even in a vehicle; a holder for floor placement is also available. The box slides into the holder and is locked to it. Once the box is full, you detach it from the holder with the key and carry it — closed, by its sturdy handle — to the processing point, where the second key opens it. Along the way, the contents are never accessible.

The ATB Cashbox can be fitted with either a double-bitted key lock or an STS security cylinder with reversible key; integration into a key plan is possible. The box is built from 2 mm sheet steel, anchoring bolts are included, and the finish is an epoxy-polyester coating in anthracite grey RAL 7024.

See also our other deposit safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.
