Additional information

brand: Technomax

Technomax Trony – Compact deposit safe with deposit slot

The Technomax Trony is a compact deposit safe, designed for the secure insertion of cash without needing to open the door. Through the 170×8mm deposit slot, users can quickly and easily drop small bundles of banknotes.

The construction follows the proven Technomax Gold series: a 5mm thick steel body and a 10mm steel door, reinforced against prying attacks. Critical locking components are protected by manganese steel drill protection.

This safe is equipped with an electronic code lock, powered by batteries or mains electricity. It also features external contact points for emergency power supply and includes a double-bit emergency key lock.

It comes with four anchoring holes in the base and four in the rear wall for secure installation on various surfaces.

See also our other deposit safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- Door and frame in 10 mm steel; single-walled body in 5 mm steel, fully welded without seams.
- Three-sided locking with steel bolts; reinforced hinges on the inside of the safe.
- Lock and locking mechanism protected by a manganese steel anti-drill plate.
- Equipped as standard with an electronic code lock on batteries or mains power, with emergency power terminals on the outside of the door and a double-bitted emergency key lock.
- Deposit slot of 170 × 8 mm.
- Four anchoring holes in the base and four in the back wall.

- Colour: dark midnight blue
