Atelier Boonen - Lampertz S

Additional information

brand: Lampertz

Lampertz S – Fire-resistant data safe for digital media (S 120 DIS)

The Lampertz S is a high-quality data safe designed for the secure storage of digital media, such as tapes, hard drives, and optical discs. It is tested according to EN 1047-1 – S 120 DIS, the most stringent European standard for data protection safes. This ensures 120 minutes of fire resistance at temperatures up to 1090 °C, including a 9.15 m drop test and thermal shock.

Unlike the SE model, the Lampertz S is not certified for burglary resistance, making it suitable for environments where certified burglary protection is not required, but fire protection for data is essential.

The multi-walled construction is filled with heat-resistant insulation and features a four-sided locking mechanism with steel bolts, specifically designed for media protection. It is available with a key lock, mechanical combination lock, or electronic code lock, optionally with an emergency key override.

The interior is optimised for media storage and can be equipped with optional shelves, pull-out drawers, or rail systems.

See also our other fire resistant cabinets and data safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

Fireproof 120 min for digital media

- Fireproof tested 120 minutes for digital media according to EN 1047-1 120 DIS
- Three-sided locking with steel bolts
- Double bit key lock as standard
- Height adjustable shelves
- Color: light gray RAL 7035
