Additional information

brand: Chubbsafes

Chubbsafes Omega Deposit – Basic security deposit safe for daily use

The Chubbsafes Omega Deposit is a practical deposit safe for depositing daily takings quickly and securely. The wide deposit flap is fitted with an anti-fishing device, which prevents contents from being retrieved through the deposit opening.

The construction offers basic burglary protection: the double-walled door features a 10 mm steel door panel, while the body is built from 6 mm sheet steel. Steel bolts with a diameter of 20 mm lock the door on three sides; together with the hook profile on the hinge side, the door is thus locked on four sides. A manganese steel anti-drill plate protects the lock mechanism against manipulation attempts.

Besides daily takings, the Omega Deposit is also suitable for depositing keys — such as car keys at garages, car dealerships or rental companies. Customers or staff deposit the key through the flap, without access to the contents of the safe.

The safe is available with a double-bitted key lock or an electronic code lock, depending on the intended use. The Omega Deposit is prepared for anchoring to the floor or wall; fixing materials are included. Available in two formats: SZ1 with 24 litres capacity and SZ2 with 48 litres capacity and shelf, each with key lock (K) or electronic code lock (E).

See also our other deposit safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- Double-walled door with 10 mm steel door panel; body in 6 mm sheet steel.
- Four-sided door locking: 20 mm steel bolts on three sides and a hook profile on the hinge side.
- Wide deposit flap with anti-fishing device.
- Lock and boltwork protected by a manganese steel anti-drill plate.
- Available with double-bitted key lock (K) or electronic code lock (E).
- Prepared for anchoring to the floor or wall, fixing materials included.
- Colour: grey.
