

## Atelier Boonen - Chubb safes ProGuard DT

### Additional information

Chubb safes ProGuard DT - Certified Deposit Safe, Grade D1 or D2 (EN 1143-2)

The ProGuard DT by Chubb safes is a high-security deposit safe, certified to the European standard EN 1143-2 in Grade D1 or D2, offering strong resistance against burglary during daily cash handling operations in retail, hospitality, or service environments.

Its deposit drawer mechanism allows valuables to be securely deposited without opening the main door. The drawer is equipped with an anti-fishing device, preventing retrieval attempts through the deposit slot.

The safe features a multi-walled, lightweight yet solid construction, reinforced with solid steel bolts, drill-resistant protection, and an active relocking device. The deposit drawer is secured with a Grade A key lock, while the main door is available with a Grade A key lock or a Grade B electronic lock (EN 1300 certified). Electronic locks offer advanced options such as time delay, time windows, and silent alarm interface.

The ProGuard DT range includes four models (M-45 to M-180) with capacities from 45 to 180 litres.

As one of the few deposit safes on the market with full burglary certification despite the deposit mechanism, the ProGuard DT is a reliable solution for secure cash drops and protection of daily takings.

Burglary resistant grade D1,D2

- ProGuard is a fully certified deposit safe, tested and certified by ECB.S in accordance with European standard EN 1143-2 in Grades I and II. Important to mention is the fact that the deposit function does not affect the indication value storage of this safe.

- The deposit function is equipped with an anti-handling device that prevents reaching the deposited values
- Proguard DT is constructed from several new burglar-resistant materials with high strength and reduced weight. This low weight has a positive impact on transportation and installation costs.
- The three-sided shot work features solid steel shots.
- For added security, the Proguard features active "relockers" and other attack-resistant additions.
- Standard equipped with a double bit key lock conform to the EN 1300 standard as the main lock.
- Deposit drawer equipped with a class A double bit key lock.
- ProGuard has a modern design and features ergonomic soft-touch handles.
- Equipped with entertainment holes in the bottom.
- Color: dark charcoal gray.
