

## Atelier Boonen - Kaso E300 Deposit

### Additional information

brand: Kaso Safes

## Kaso E-300 - Certified deposit safe with keyless drawer system

The Kaso PTK E-300 is a high-security deposit safe, designed for intensive daily use in environments such as retail, hospitality, and logistics. Both the safe and the integrated deposit drawer are tested and certified according to EN 1143-2, and available in Grade II or III, depending on the model.

Unlike conventional deposit safes, the E-300 features a drawer without a lock, allowing users to make secure deposits without keys or codes. Once inserted, contents fall automatically into the secured compartment. A built-in anti-fishing mechanism prevents access to the deposited valuables through the drawer.

Built from reinforced steel, the E-300 offers excellent burglary resistance. The deposit drawer can be placed at the front or rear of the safe, providing installation flexibility for various operational layouts.

The Kaso E-300 comes in three model sizes, and is available with a standard key lock or optional alternative locking systems. Finish: light grey (RAL 7035).

### Burglary resistant Class D1,D2,D3

- The Kaso PTK E400 Deposit is a fully certified skimming safe, tested and certified by ECB.S in accordance with the European standard EN 1143-2 in Grades I,II or III. Important to mention is the fact that the deposit function does not affect the indicative value retention of this safe.
- The deposit system is equipped with an anti-handling device that prevents reaching the deposited values.
- No keys or codes are required for depositing. However, the drawer can be optionally equipped with a lock.
- The door and body are constructed of BFP, a multi-walled construction developed by Kaso with excellent break-in and fire-resistant properties. BFP allows the safes to be built up to three times lighter than with traditional armor.
- Four-sided locking.
- Fitted as standard with a Mauer class A double bit key lock.
- Provided for bottom anchoring.
- Deposit drawer can be placed at the front or rear of the safe.
- Possibility of opening to the left.
- Color: light grey RAL 7035.
