Atelier Boonen - Fichet-Bauche Complice wall safe

Additional information

brand: Fichet Bauche

Fichet-Bauche Complice wall safe – Built-in safe Grade 0

The Fichet-Bauche Complice wall safe is a compact built-in safe, manufactured in France, designed to be built into a wall or embedded in concrete. The wall thus becomes part of the protection, while the safe remains discreetly concealed.

The safe offers certified protection against burglary according to the European standard EN 1143-1, Grade 0, with A2P certification following tests by the CNPP laboratory.

The body of the safe is made of single-walled sheet steel: once built in or embedded in concrete, the wall itself takes over the protection of the body. All resistance is therefore concentrated in the armoured door. The weight remains limited as a result — 27 to 45 kg depending on the model — which makes delivery and installation considerably easier, even on an upper floor.

The armoured door, with a total thickness of 87 mm, is fitted with steel locking over its full height, protected laterally by an armour plate, and a hook bar on the hinge side that effectively prevents the door from being lifted off. An additional blocking mechanism automatically locks the door in the event of an attack with mechanical or thermal tools. Thanks to the external hinges, the door opens up to 180°, giving particularly easy access to the contents.

Two locking systems are available:

– K models: high-security Fichet-Bauche MPX key lock, combined with the mechanical Trois Tubes Compteurs (3T) counter combination

– E models: Fichet-Bauche Nectra electronic code lock

The locking systems are A2P certified and comply with the European standard EN 1300.

The Complice wall safe is available in three capacities: 10, 20 and 40 litres, each with key lock (K) or electronic lock (E). If you are looking for a free-standing safe instead, to be fixed to the floor or wall, see the free-standing Fichet-Bauche Complice — also available in 80 litres and with certified fire protection on the 20 to 80 litre models.

See also our other built-in safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

Burglary resistant class 0
Indication value storage class 0: € 7 000 cash or € 14 000 valuables

- Tested by the CNPP laboratory and A2P certified in accordance with the European standard EN 1143-1, Grade 0.
- Body in single-walled sheet steel — once built in, the wall takes over the protection of the body; armoured door of 87 mm.
- Steel locking over the full height of the door, protected laterally by an armour plate; hook bar on the hinge side.
- Blocking mechanism that automatically locks the door in the event of an attack with mechanical or thermal tools.
- K models with Fichet-Bauche MPX key lock and mechanical Trois Tubes Compteurs (3T) counter combination; E models with Nectra electronic code lock — A2P certified (EN 1300).
- External hinges; door opens up to 180°.
- Limited weight of 27 to 45 kg: easy delivery and installation.
- Manufactured in France.
- Colour: anthracite grey.
