

Atelier Boonen - Robur Depositsafe

Additional information

Robur Deposit Safes – High-security solution with certified drawer protection (EN 1143-2 D2, D3, D4)

Robur deposit safes are among the most secure options available for managing daily cash drops. They are fully tested and certified according to EN 1143-2, available in Grade D2, D3, or D4 – the highest protection levels for deposit systems on the market.

What sets Robur apart is its integrated drawer locking mechanism. Unlike standard deposit safes, which are often vulnerable when the drawer is not locked, the Robur system automatically activates a reinforced rear shield inside the drawer in case of attack. This barrier physically prevents access to the contents of the safe – even if the drawer itself remains unlocked.

This makes the Robur deposit safe ideal for environments where frequent cash deposits are required without granting access to the main safe compartment. Each model comes standard with high-security key locks (one for the door and one for the drawer), and optional electronic or mechanical combination locks are also available. The deposit drawer can be positioned at the front, side, or rear, depending on the installation setup.

The safes are available in multiple sizes and come in a pearl white (RAL 9010) finish, with anchoring holes provided as standard.

Break-in resistant Class D2,D3,D4

- The Robur D IV Deposit is a fully certified deposit safe, tested and certified by ECB.S in accordance with European standard EN 1143-2 in Grades II, III and IV. Important to mention is the fact that the deposit function does not affect the indicative value storage of this safe.
- The deposit system is equipped with an anti-handling device that prevents reaching the deposited values.
- The deposit drawer is equipped with a passive "relocking" system. This mechanism blocks the drawer in case of a burglary attempt.
- Door and body are constructed of UHPC composite material developed by Robur and reinforced with various burglar-resistant fittings.
- Very heavy lateral locking with reinforced hook profile on the hinge side. The framework is additionally protected with armor plates and a double acting locking system.
- Drawer and door come standard with S&G FAS reversible double bit key lock.
- Provided for anchoring in the floor.
- Deposit drawer can be placed at the front or rear of the safe.
- Possibility of opening door to the left.
- Color: light gray RAL 7035.

Model specifications

Model	Outer dimensions (mm)	Internal dimensions (mm)	Volume (L)	Weight (kg)	Shelves
