Atelier Boonen - Vault rooms and vault doors Chubbsafes

Additional information

brand: Chubbsafes

Chubbsafes - Certified Strong Rooms and Vault Doors up to Grade XIII KB EX

Chubbsafes, a brand of the Gunnebo Group, offers a full range of certified strong rooms and vault doors, tested according to the EN 1143-1 European standard, with protection levels up to Grade XIII KB EX. These solutions are designed for high-security applications such as banks, government facilities, defence sectors, and critical infrastructure.

Chubbsafes strong rooms are available as modular constructions using prefabricated panels or as cast-

in-situ concrete vaults, combining multi-layer steel and barrier materials to resist burglary, fire, and explosives.

The vault doors can be equipped with EN 1300 certified locks, including key locks, mechanical combinations, or electronic code locks. Optional features include fire resistance, drill and blast protection, and preparation for intruder alarm system (IAS) integration.

Chubbsafes strong room solutions are globally recognized for their maximum physical security, design flexibility, and high-quality manufacturing, making them a trusted choice for any environment where certified protection is critical.
