Atelier Boonen - Fichet-Bauche Moneo

Additional information

brand: Fichet Bauche

The Fichet-Bauche Moneo mechanical combination lock is one of the most advanced models in the Fichet-Bauche range, designed for applications requiring the highest security standards. Unlike the MC4, the Moneo features seven dials, providing more than 60 million possible combinations.

Operation is intuitive through precise, tactile clicks, making the lock easy and practical to use. A silent version without audible clicks is also available, ideal for preventing eavesdropping attempts. When opening, the dials automatically reset to zero (automatic code scrambling), ensuring the entered code is never left visible.

Certified to EN 1300 Class C (C/E), the Moneo lock is fitted as standard on the Fichet-Bauche Atrius and Inviktus models. In addition, it can be installed on virtually all other Fichet-Bauche safes and fire-resistant cabinets, making it a highly versatile and reliable solution for professional security needs.
