Atelier Boonen - De Raat PT

Additional information

brand: De Raat Safes

De Raat PT Security Cabinet – double-walled design with key or code lock

The De Raat PT security cabinets feature a double-walled body and door, constructed from steel plate and filled with mineral wool. The door includes a 6 mm solid steel plate and is equipped with a manganese steel drill protection. The cabinet is secured on three sides by solid steel locking bolts. Internal hinges allow for a door opening of 90°.

PT models are fitted as standard with a flush-mounted double-bitted key lock. ET models come with an electronic code lock, which protrudes approximately 25 mm from the door surface. The interior is equipped with height-adjustable shelves for flexible organisation. Anchoring holes are provided in both the base and the rear panel. Finished in light grey (RAL 7035).

De Raat PT no longer available

The De Raat PT is no longer available and has been replaced by current alternatives within the DRS range. For similar applications, you can choose the De Raat DRS Global or the DRS Eurolite, depending on the required dimensions, security level and intended use.

See also our other security cabinets or read how to approach buying a safe in Belgium, with delivery and installation by our own team.
