Atelier Boonen - Salvus Ravenna

Additional information

brand: Salvus safes

Salvus Ravenna – Burglary- and fire-resistant safe Grade 1 (LFS 30P)

The Salvus Ravenna is a safe tested and certified by ECB·S according to the European standard EN 1143-1 Grade 1, additionally offering 30 minutes of fire protection for paper, tested to EN 15659 – LFS 30P. This standard provides protection up to 850 °C in situations with limited fire risk.

The safe has a multi-walled construction, filled with a mineral composite that contributes to both fire resistance and burglary resistance. The door is locked on four sides: three sides with moving steel bolts and, on the hinge side, a hook profile that engages into the body over the full height of the door. Even if the hinges are attacked or damaged, the door thus remains firmly locked into the body.

As standard, the Salvus Ravenna is equipped with a double-bitted key lock. All models can also be fitted with an EN 1300 certified mechanical combination lock or electronic code lock. The safe is prepared for floor anchoring.

The Ravenna is available in ten models from 24 to 283 litres, offering a suitable size for virtually every space and application. If you require longer fire protection, the Salvus Bologna from the same range offers 60 minutes of protection for paper.
