Atelier Boonen - ATB STL for car keys

Additional information

brand: ATB Safes

Key cabinet for car keys — EN 1143-1 grade 1 certified safe

The ATB STL is a key cabinet with a robust construction designed for intensive professional use. It is specifically developed for the secure storage of car keys and large key bunches. Based on the structure of the ATB L series, it features a modified interior with reinforced hooks spaced 34 mm horizontally and 98 mm vertically, providing ample space for modern car keys, remote controls and identification labels.

The series is available in capacities of 30, 72, 144, 280, 504 or 1,008 car keys — sometimes also referred to as a professional key safe. The generous hook spacing accommodates both small and very large key collections, with a suitable model available for every need.

Certified to EN 1143-1, grade 1, the ATB STL is a genuine certified key safe offering reliable protection against burglary. The door opens to 180°, is right-hinged and locks on four sides via solid steel bolts. From model STL 72 onwards, the key panels are pull-out for increased capacity, better overview and ease of use.

Floor and wall anchoring is provided as standard, including fixing materials. Depending on the desired access control, the cabinet can be fitted with a key lock, mechanical combination lock or electronic code lock. Electronic locks can be supplemented with an audit function, time functions or a mechanical emergency key. The cabinet can also be operated via badge, tag or fingerprint reader, with connection to an existing access control system and management of different user permission levels.

The ATB STL is a certified and well-considered solution for professional key management — for car dealers, garages, body shops, vehicle rental companies, fleet managers and any organisation wishing to store large numbers of car keys or remote controls securely and efficiently. For electronic key management with individual loan registration, see also our electronic key cabinets and lockers.

See also our other key safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

Burglary-resistant Class 1
Indicative insurable value Grade I: €10,000 in cash or €20,000 in valuables

- Tested and certified by ECB·S in accordance with European standard EN 1143-1 Grade I

- Designed for key and key bunch storage
