Atelier Boonen - ATB GS Combi Weapon Safe

Additional information

brand: ATB Safes

ATB GS – Grade I gun safe for long and short firearms (EN 1143-1)

The ATB GS gun safe is designed for the secure storage of long firearms, in accordance with the European EN 1143-1 standard, Grade I. Built on the same structure as the ATB C pistol safe, it includes an integrated rack for rifles and shotguns. Depending on the model, the safe can accommodate firearms up to 1470 mm in length.

Its reinforced construction features a four-sided locking system with solid steel bolts and fixed locking pins on the hinge side. The right-hinged door opens to 180°. Anchoring holes for floor and wall mounting are pre-drilled, and mounting hardware is included.

The ATB GS is equipped with a double-bitted key lock as standard. Optional locking systems include mechanical combination locks or electronic code locks, with features such as time delay, audit trail, or an emergency override key.

Most models can be equipped with a lockable interior compartment – ideal for storing ammunition or personal items.

The ATB GS is available in various models up to 1550 mm in height, with capacity for 6 to 14 firearms, optionally combined with shelves for ammunition or documents. Finished in graphite grey (RAL 7024).
