Atelier Boonen - ATB KSB

Additional information

brand: ATB Safes

Keysecuritybox – Secure and reliable key drop system

The Keysecuritybox is designed for the safe deposit of keys and key cards outside of business hours. It is ideal for garages, car rental agencies, leasing companies, holiday parks, and B&Bs. Thanks to a secure key drum that automatically returns to the closed position after use, keys remain protected against unauthorized access.

The KSB 107 integrates seamlessly into the façade and is suitable for walls up to 340 mm thick. Once the key is deposited, it drops directly into the safe located inside the building.

See also our other key safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.
