Atelier Boonen - ATB Bravo- Safe grade 3

Additional information

brand: ATB Safes

ATB Bravo – compact burglary resistant safe (Grade 3, EN 1143-1, ECB·S)

The ATB Bravo range consists of compact and robust Grade 3 burglary resistant safes, officially certified by ECB·S according to the European standard EN 1143-1. This certification confirms that ATB Bravo safes meet the strictest requirements for burglary resistance.

Each safe is built with a multi-walled steel construction, combining different types of steel, armour plates, reinforcing elements and a core of UHPC (Ultra High Performance Concrete). The door is locked on three sides with solid steel bolts, while fixed bolts on the hinge side prevent side attacks. A passive relocking system automatically engages in the event of a burglary attempt.

A fire-resistant intumescent seal around the door and frame provides additional protection against heat, smoke and flames.

The ATB Bravo range includes 9 models with capacities from 18 to 604 litres. A unique feature is the inclusion of the smallest safe on the market that is officially certified Grade 3. This makes it the most secure safe available in such a compact format. Although designed as a freestanding safe, its dimensions also allow it to be built into a wall or used as an inner safe inside a larger safe or armoured cabinet.

Available locking options include a key lock, mechanical combination lock, electronic code lock, or a combination thereof, all certified according to EN 1300.

Thanks to their compact size, official Grade 3 certification and flexible installation options, the ATB Bravo burglary resistant safes are an ideal solution for private users and businesses requiring a reliable and space-saving security option.
