

Atelier Boonen - Sistec ES I safe

Additional information

Sistec Eurosafe ES I - Burglary-resistant safe (EN 1143-1 Grade I, ECB-S)

The Sistec Eurosafe ES I is a burglary-resistant safe, certified to EN 1143-1, Grade I and approved by ECB-S. This series offers a solid entry-level solution for private or professional use where certified protection is required.

The safe features a multi-walled steel body with burglary-resistant infill, and a 10mm thick solid steel door plate. The three-sided locking system uses solid steel bolts. The locking area is protected by manganese steel anti-drill plating, and a passive relocker automatically blocks the mechanism in case of an attack.

The flush-mounted door and internal hinges eliminate access to the locking or hinge side for direct attacks.

The Sistec Eurosafe ES I is supplied as standard with an EN 1300-certified double-bit key lock. Optional configurations include a mechanical combination lock or an electronic code lock with functions such as time delay and multi-user codes.

Anchoring is possible via the base or rear wall. Anchoring material is included.

Burglary-resistant Class 1

Indicative value storage class 1: € 10 000 cash or € 20 000 valuables

- Tested and certified by ECB.S in accordance with European standard EN 1143-1 in Grade 1.
