Atelier Boonen - MGB Hotel safes

Additional information

The ATB hotel safes (MGB series) are compact and well-built safes designed for use in hotel rooms, holiday accommodations and project-based installations. Available from a minimum order of 5 units, they offer a practical and reliable solution for securely storing guests' personal belongings. See also our full range of hotel safes and in-room safes for hotels and care institutions.

These safes are designed as theft-resistant safes with a burglary-deterrent function, ideal for lower-risk environments where official burglary or fire certification is not required. With a 2 mm steel body and 5 mm thick steel door, they provide solid day-to-day protection in hospitality settings.

See also our other hotel safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- 2 mm steel body, 5 mm steel door
- Electronic code lock with hotel and private modes
- Compact size, suitable for wall or cabinet installation
- Simple audit function (basic logging of openings)
- Access via user code or mechanical key (depending on model)
- Burglary-deterrent protection for low insured-value items
- Pre-drilled anchor points for floor or wall mounting
- Professional project supply from 5 units minimum
- Neutral, modern finish fits seamlessly into any room interior
