Atelier Boonen - ATB Hotelsafes

Additional information

ATB hotel safes are reliable and discreet electronic safes designed for use in hotel rooms, serviced apartments and vacation rentals. They are offered exclusively for project-based orders with a minimum of 5 units, making them ideal for professional applications where consistency and quality are key.

ATB offers two models tailored to different security needs:

- The Safeguard: a durable and user-friendly safe with manual locking, LED indicators, audible alerts and a basic audit function.
- The Supra: a premium model with motorized locking, backlit keypad, large display, advanced audit trail and multiple emergency access options.

Both models are available in various sizes (including laptop-friendly formats) and can be equipped with optional features such as internal power, lighting, and custom configurations. With their sleek design and robust performance, ATB safes offer a perfect balance of security and convenience for the hospitality sector.

See also our other hotel safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.
