Atelier Boonen - Drawer safe ATB GC

Additional information

brand: ATB Safes

ATB Drawer Safe – Compact and Discreet Security Solution

The ATB drawer safe is designed for use in confined spaces, such as beneath furniture or in a vehicle's boot. Constructed from 3 mm thick steel plate, it offers a robust and durable structure.

The door interlocks on all four sides with the body and is secured by solid steel locking bolts. Both the locking mechanism and the bolts are protected against drilling. The safe is equipped as standard with a double-bitted key lock; alternative locking systems, including mechanical or electronic code locks, are also available as standard options.

Anchoring points are provided in the base and rear panel to allow secure floor or wall installation. The ATB drawer safe combines compact installation with dependable physical protection, making it suitable for a wide range of applications where fixed, space-efficient security is required.
