Atelier Boonen - ATB EM

Additional information

brand: ATB Safes

ATB EM - Electronic Safe for Basic Home Security

The EM is our most accessible entry-level safe, designed for home use or environments with low security risk. This compact personal safe provides simple protection against theft and unwanted access.

It features an easy-to-use electronic lock with an illuminated keypad and emergency override key. The single-walled steel body includes a two-point locking system and internal hinges for a discreet appearance. Pre-drilled holes are provided for anchoring to the wall or floor — a crucial feature for lightweight safes like this.

The ATB EM safe is an affordable and practical choice for securing passports, documents, cash, or other small valuables at home. The EM200 model, with a clear opening of H137 × W403 mm, is also suitable as a laptop safe; most 17-inch laptops fit inside without difficulty.

See also our other security cabinets or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- 1 side locking by means of 2 steel shots
- Hook-in profile on hinge side
- Illuminated display
- Electronic code lock with emergency key
- Emergency power supply on the outside
- Anchor holes in back and bottom
