Additional information

brand: Chubbsafes

Chubbsafes Consul – Burglary-resistant safe EN 1143-1, Grade I

The Chubbsafes Consul is a lightweight safe certified for burglary resistance according to EN 1143-1, Grade I, tested and approved by ECB·S. This series offers a cost-effective solution for those seeking a reliable entry-level model with a recognised level of security.

The safe features a multi-walled body with burglary-resistant infill. The door is fitted with a 10 mm steel front plate and locks on three sides by means of movable steel bolts. On the hinge side, locking is ensured by reinforced internal hinges. Each model has two top bolts, two bottom bolts and, depending on the model, three or four front bolts.

The lock and locking mechanism are protected by a manganese steel drill-resistant plate. The safe is also equipped with a relocking system that automatically blocks the mechanism in the event of an attack.

Anchoring to the floor or rear wall is possible; mounting hardware is included.

As standard, the Consul is equipped with a double-bitted key lock. Various electronic code locks are available as an option, with functions such as time delay and multiple user codes.

Available in several sizes, with internal volumes ranging from 13 to 82 litres. From model 25 upwards, the internal dimensions are suitable for storing A4 binders.
