Atelier Boonen - ATB MT

Additional information

brand: ATB Safes

ATB MT Security Cabinet - Security Level S1 (EN 14 450)

The ATB MT is a lightweight, certified security cabinet offering protection against burglary in accordance with EN 14 450 – Security Level S1. Tested and certified by ECB·S, it combines robust steel construction with excellent value for money. The single-walled body is made of 3 mm thick steel plate. The cabinet features three-sided locking with solid steel bolts and a hooked profile on the hinge side for added resistance. The lock and mechanism are protected against drilling.

A double-bitted key lock is fitted as standard, with optional mechanical or electronic lock systems available. External hinges allow the door to open a full 180°. One adjustable shelf is included. The cabinet is prepared for both floor and wall anchoring and available in four sizes. Multiple cabinets can optionally be bolted together in column formation and mounted on a plinth. Wall mounting is also possible.

Thanks to its solid build quality, the ATB MT is ideal for intensive professional use, including as a secure cabinet or gun safe.
