Atelier Boonen - ATB ORGUS

Additional information

brand: ATB Safes

ATB ORGUS Security Cabinet – Security Level S2 (EN 14 450)

The ATB ORGUS is a robust security cabinet certified for burglary resistance according to the European standard EN 14 450 – Security Level S2. Tested and certified by ECB·S, it is designed for professional and private use where reliable burglar resistance is required. The double-walled construction consists of two layers of steel plate with a filled cavity that increases resistance against attacks.

The cabinet is fitted as standard with a double-bit key lock, replaceable on request with a wide range of locking systems: mechanical or electronic code locks with time delay or audit trail, badge locks, locks controlled via alarm panel, or classic key locks. It features three-sided locking with solid steel bolts and fixed steel bolts on the hinge side. External hinges allow the door to open 180°. The lock and bolt mechanism is protected against drilling.

Prepared for both floor and wall anchoring, the cabinet comes with one adjustable shelf. Available in 7 sizes, with the option to bolt multiple cabinets together in column formation or place them on a plinth. Wall mounting is also possible.

The ATB ORGUS combines solid protection with practical functionality and is also suitable for use as a gun cabinet.
