Atelier Boonen - Asecos Q-LINE Classic 30

Additional information

brand: Asecos

Asecos Q-LINE Classic 30 – Safety cabinet / chemical storage cabinet (30 minutes)

The Asecos Q-LINE Classic 30 is a durable safety cabinet, also referred to as a chemical storage cabinet, designed for the safe storage of flammable hazardous materials in workplaces. It offers 30 minutes of fire resistance (type 30), tested according to EN 14470-1 and compliant with TRGS 510.

With its integrated transport base, the cabinet can be easily moved upright through standard doorways. The cylinder lock with status indicator ensures secure access, and the air duct connection (DN 75) allows for safe extraction of hazardous vapours to prevent explosive atmospheres.

The cabinet is triple certified (EN 14470-1, FM, UL), and comes in a choice of 7 modern door colours at no additional cost. A smart, practical solution for effective chemical safety in labs, workshops, and technical spaces.

See also our other safety cabinets for flammable products, supplied and installed by our own team in Belgium.
