Atelier Boonen - Asecos XL-LINE

Additional information

brand: Asecos

Asecos XL-LINE – Safety chemical cabinet for large drums and containers

The Asecos XL-LINE cabinet is designed for the secure storage of 200-liter drums and large containers with flammable liquids. This chemical cabinet is type-tested to EN 14470-1 (type 90) and provides 90 minutes of certified fire resistance.

Integrated air ducts (DN 75) allow connection to an external exhaust system for the safe extraction of hazardous vapours. A continuous internal and external grounding system, including a 3 m grounding cable and clamp, ensures safe decanting.

Its robust construction, lockable doors and optional height-adjustable shelves make this chemical cabinet a reliable solution for industrial use. The integrated transport base enables easy relocation within your facility.

The Belgian rules for storing flammable liquids, from the Code to the regional thresholds, are explained in our guide to the storage of hazardous substances.

See also our other safety cabinets for flammable products, supplied and installed by our own team in Belgium.

- Fire resistance: 90 minutes (type 90), tested according to EN 14470-1
- Suitable for secure storage of large containers and 200-liter drums
- Robust outer housing made of powder-coated sheet steel (light grey RAL 7035)
- Lockable doors with profile cylinder, compatible with central locking systems

- Continuous internal and external grounding, includes 3 m cable with clamp
- Integrated air ducts (DN 75) for connection to exhaust ventilation
- Integrated transport base for easy in-house relocation
- Optional adjustable shelves for efficient use of storage capacity
