Atelier Boonen - Used & Refurbished Safes

Additional information

brand: ATB Safes

Professional second-hand safes and strongboxes

We offer a carefully selected range of used safes and strongboxes, sourced from professional environments such as banks and businesses. Most of these models weigh at least 500 kg and belong to the higher segment. Each safe is thoroughly inspected, mechanically serviced, and supplied with two keys and a two-year warranty, in line with the conditions of most new models.

On request, these refurbished safes can be customised to meet your specific needs, with options such as a plinth, an internal compartment, an electronic lock, a time lock for controlled access, or a gun rack for secure firearm storage. With their robust construction and long lifespan, these second-hand safes represent a reliable and cost-effective alternative to new models, often offering savings of more than 50%.

See also our other second-hand safes or read how to approach buying a safe in Belgium, with delivery

and installation by our own team.

Vintage and antique safes

In addition to our professional range, we also offer a selection of vintage and antique safes, including pieces that are over a hundred years old. These safes stand out not for modern functionality, but for their unique appearance, character, and historical value. Preserved in their original condition, they are chosen as decorative objects, collector's items, or striking features in an interior.

These vintage strongboxes form an exclusive category within our collection. Their timeless design and artisanal craftsmanship make them particularly appealing to those who value authenticity and aesthetics.

Our showroom can be visited by appointment only. Please feel free to contact us for further information, availability, or to arrange a tailored visit.
