Atelier Boonen - Creone KeyRack KeyControl - Intelligent key strips

Additional information

brand: CREONE

Creone KeyRack: IntelliPin key strips on the wall or in a cabinet

With the Creone KeyRack, your keys hang on strips mounted directly on the wall or inside a cabinet. Each key gets an IntelliPin, a key tag with a unique ID, so the system knows which key hangs where, who takes it and when it comes back.

You freely combine locking and non-locking strips, each with 14 key positions. A locking strip holds the key until an authorised user enters their code; a non-locking strip raises an alarm if a key disappears without authorisation. The KeyRack is supplied with a complete mounting kit for 5, 10 or 15 strips. One control unit manages up to 66 strips, 924 key positions in total.

On the wall you get the fastest overview. If the keys also need protection against theft or fire, you mount the strips in a cabinet of your choice, for example one of our security cabinets or fire-resistant cabinets.

The control unit has a display with a search function. Users log in with a PIN code or a card reader, and an external alarm can be connected. Management is done with KeyWin6, as a cloud service via Microsoft Azure or as software on your own server: book keys in advance, set up groups and time channels, colour-code keys, view reports and receive alarm notifications by e-mail.

The KeyRack itself is not certified against burglary or fire; the protection depends on the cabinet in which the strips are mounted. If you prefer a ready-made cabinet with a display, the Creone KeyBox KeyControl is the logical choice.

See also our other Creone key and locker management systems, supplied and installed by our own team in Belgium.

- Key recognition: IntelliPin key tag with a unique ID
- Strips: locking or non-locking, freely combinable; 14 key positions per strip

- Capacity: up to 66 strips and 924 key positions per control unit
- Control unit: 365 × 190 × 90 mm (H × W × D)
- Mounting kits: 5 strips 450 × 560 × 85 mm, 10 strips 870 × 560 × 85 mm, 15 strips 1320 × 560 × 85 mm (H × W × D)
- Mounting: on the wall or in a cabinet of your choice
- Operation: display with search function; login by PIN code or card reader
- Alarms: door alarm, key alarm and burglar alarm, can be forwarded by e-mail
- Software: KeyWin6, as a cloud service (Microsoft Azure) or on your own server; bookings, groups, time channels, colour coding, reports
- Not certified against burglary or fire; the protection depends on the cabinet in which the strips are mounted
