Atelier Boonen - Creone ValueBox Control - Intelligent smart lockers for professional management

Additional information

brand: CREONE

Creone ValueBox Control: compartments in three sizes, managed with KeyWin6

The Creone ValueBox Control is a tall cabinet with lockable compartments for equipment and personal items used by several people: laptops, projectors, cameras, measuring instruments, bags or phones. Authorised users open their compartment with a PIN code or a badge, without an administrator having to be there. Every removal and return is recorded.

You configure the cabinet with compartments in three sizes, all 310 mm wide and 350 mm deep: large compartments 360 mm high, for example for lost property at a station or airport, medium ones of 175 mm for equipment such as projectors or measuring instruments, and small ones of 75 mm for phones, wallets and other personal belongings. The cabinet measures 1730 × 800 × 400 mm (H × W × D).

The cabinet has a display with a search function and a service menu. Users log in with a PIN code or a card reader, with a validity period per user and time channels per group. There is a door alarm and a burglar alarm, and the cabinet can be connected to an external reader or an external alarm. A battery backup keeps it working during a power cut.

Management is done with KeyWin6, as a cloud service via Microsoft Azure or as software on your own server, from any computer or tablet. You import users via CSV or XML, get reports as PDF, and alarms are

sent to the administrator by e-mail. The same software also manages the Creone KeyBox KeyControl and KeyRack, so keys and compartments are in one system.

The ValueBox Control is a management cabinet, not a safe: it is not certified against burglary or fire. For a smaller wall-mounted code cabinet with 2 to 6 compartments, there is the Creone ValueBox Basic, System & Expansion.

See also our other Creone key and locker management systems, supplied and installed by our own team in Belgium.

- Compartments in three sizes, freely combinable: large 310 × 350 × 360 mm, medium 310 × 350 × 175 mm, small 310 × 350 × 75 mm (W × D × H)
- Cabinet dimensions: 1730 × 800 × 400 mm (H × W × D)
