Atelier Boonen - Weapon cabinets and safes for professional use

Additional information

Weapon Cabinets and Safes for Professional Users

Professional organizations such as police, military, customs authorities, and licensed firearms dealers are subject to strict regulations regarding the secure storage of weapons and ammunition. To meet these requirements, specially designed weapon cabinets and safes are available, offering the highest standards of security, durability, and ease of use.

Secure and Controlled Weapon Storage

Our weapon cabinets and safes are designed to minimize the risk of unauthorized access and misuse. Depending on the application, they can be equipped with electronic code locks, biometric access systems, or mechanical combination locks. For organizations with multiple users, versions with audit trail functionality or integration into an access control system are available. To record per user who takes out and returns which weapon, see electronic weapon management from Axcor, our brand for key, locker and weapon management.

See also our other weapon safes or read how to approach buying a safe in Belgium, with delivery and

installation by our own team.

Applications by Sector

- Police and law enforcement: deposit safes and storage cabinets for securely storing service weapons, equipped with individual compartments and traceable access control.
- Military and defense: robust weapon safes and fully equipped armouries, suitable for larger quantities of weapons and ammunition.
- Customs and special units: compact and mobile solutions combining security with rapid deployment.
- Firearms dealers and shooting ranges: secure cabinets and safes for storing commercial stock and in-use weapons, with separate compartments for ammunition.

Flexibility and Custom Solutions

Each organization has its own operational requirements. Our solutions can therefore be tailored to the type of weapons, the number of items to be secured, and the desired internal layout. Options include adjustable racks for rifles, compartments for pistols, lockable drawers for ammunition, or foam-lined interiors for delicate components. Special dimensions or integration into existing facilities are also possible.

Installation and Service

A weapon cabinet or safe is only fully reliable when installed correctly. We provide professional placement and anchoring in compliance with applicable safety regulations. Maintenance services, key and lock management, and technical support are also available to ensure long-term and worry-free operation.

Contact us for more information or a non-binding quotation. Our specialists will be glad to advise you on the most suitable solution for your organization.
