# Atelier Boonen - ATB ODS

## Additional information

brand: ATB Safes

ATB ODS - S2 fire-resistant data safe with 60-minute fire protection for digital data media

The ATB ODS range consists of fire-resistant data safes for the secure storage of heat-sensitive digital storage media, such as backups, hard drives, USB devices, tapes and other data carriers. The safes are certified according to EN 14450, security level S2, and provide 60 minutes of certified fire protection for data media according to NT FIRE 017.

The range includes several models with capacities from 118 to 587 litres. Thanks to the practical interior fittings with adjustable shelves and optional accessories, such as drawers, pull-out shelves and insertable data media baskets, the safe can be adapted to the required storage needs.

ATB ODS data safes are fitted as standard with a double-bit high-security key lock with two keys, four-sided door locking and a door that opens 180° for easy access to the contents. The door is hinged on the right, and the safes are prepared for floor anchoring, including anchoring material.

The safes are available in graphite grey RAL 7024 or light grey RAL 7035. Optionally, they can be equipped with a mechanical combination lock or an electronic lock, including the Pulse Pro II or the KABA Combi B 90 with emergency key.
