Additional information

brand: Burg-Wächter safes

BURG-WÄCHTER OfficeLine – burglary-resistant safe Grade 1 and 2

The BURG-WÄCHTER OfficeLine is a professional burglary-resistant safe designed for the secure storage of cash, documents, files and other valuables. The range is certified according to the European standard EN 1143-1 and is available in Grade 1 and Grade 2. This makes the OfficeLine particularly suitable as a safe for offices and businesses, as well as for private homes where certified burglary protection is required.

The OfficeLine features a double-walled door and body combined with a robust four-sided locking system. The door is secured on three sides by solid round steel bolts with a diameter of 28 mm. Fixed steel bolts on the hinge side provide additional protection. A non-resettable emergency locking system blocks

the locking mechanism in the event of a targeted attack. Grade 2 models are equipped with a double emergency locking system.

Thanks to the external hinges, the door can be opened to more than 180°. The wide opening provides easy access to the entire interior of the safe.

The OfficeLine is available in four sizes with capacities of 87, 122, 174 and 315 litres. The interior is deep enough to accommodate standard office binders and is fitted with height-adjustable shelves. This allows the available space to be configured for documents, files, cash boxes and other valuables.

The OfficeLine can be equipped with the SecuSafe double-bit key lock. This armoured high-security lock is VdS-tested class 2 and ECB·S certified according to EN 1300 class B. The safe is also available with the programmable SecuTronic electronic combination lock with fingerprint recognition.

The safe is prepared as standard for floor anchoring. Preparation for additional anchoring through the rear wall is available on request. The standard colour is light grey RAL 7035; other RAL colours are available as an option.
