Atelier Boonen - Asecos G-OD

Additional information

brand: Asecos

Asecos G-OD – Outdoor gas cylinder cabinet

The Asecos G-OD is a cabinet for storing gas cylinders in the open air, for example against a façade or on a yard next to the workshop. The fully galvanised sheet-steel construction also has a plastic-coated textured surface, the floor is stainless steel and the sloping roof with overhang lets rainwater run off easily.

Ventilation openings in the doors provide natural ventilation so that leaking gas does not linger in the cabinet. Inside, mounting rails and a holder with straps keep the cylinders upright, and a side holder for 10-litre cylinders adjusts in height without tools. The hinged doors open wide and are also available with a fixed or opening window to check the fittings without opening the door. An optional ramp makes it easier to wheel in heavy cylinders.

The doors lock with a profile cylinder lock with status indicator and can be integrated into a central locking system. The G-OD comes in three widths: 70 cm for 2 cylinders of 50 litres, 100 cm for 3 and 135 cm for 5.

See also our other gas cylinder cabinets, supplied and installed by our own team in Belgium.

- Outdoor gas cylinder cabinet, compliant with EN 16121 and EN 16122
- Fully galvanised sheet steel with plastic-coated textured surface
- Stainless steel floor, sloping roof with overhang
