Atelier Boonen - Asecos CX-LINE

Additional information

brand: Asecos

Asecos CX-LINE – cabinet with built-in recirculation filter

The asecos CX-LINE is a cabinet for non-flammable hazardous substances, such as toxic substances, with built-in recirculating extraction. A fan draws the vapours out of the cabinet, an activated carbon filter retains them and the cleaned air returns to the room. No exhaust duct to the outside is needed, so you can choose the location of the cabinet freely.

The system is quiet, at about 39 dB(A), and the filter is recyclable. Check for each substance whether the filter is suitable and replace it according to the manufacturer's instructions; this can be done during the annual maintenance by the asecos service department, which you order from us.

The CX-LINE is available as a cabinet with glazed doors (1055 or 810 mm wide) and as a MultiRisk version with 4 separately lockable compartments. The cabinet is not fire-resistant; flammable liquids belong in a cabinet to EN 14470-1. Extraction and filters are explained in our guide to the storage of hazardous substances.

See also our other cabinets for acids and alkalis, delivered and installed by our own team in Belgium.

- Cabinet for non-flammable hazardous substances, not fire-resistant
- Built-in recirculating extraction with activated carbon filter; no duct to the outside needed
- Noise level approx. 39 dB(A); 230 V, power consumption 120 W
- Versions: CX.229.105.WDFW and CX.229.081.WDFW with glazed doors, CX.229.105.MM.4WD with 4

lockable compartments
- Fittings with shelves and bottom sump or pull-out trays with plastic sump
- Colour: body anthracite grey (RAL 7016), doors light grey (RAL 7035) or pure white (RAL 9010); MultiRisk with pure white doors
